Subject: Re: [SoftwareControlledHamRadio] Microphone

[Edited Message Follows]

I need to make a bill of materials and some assembly instructions. Stay tuned.

3 mm inserts qty

5 https://www.amazon.com/dp/B0D475LRH3?ref=ppx_hzsearch_conn_dt_b_fed_asin_title_1&th=1

3x12 hex head qty 2

3x8 hex head qty 3

6 mm mic element (I sometimes use 10mm)

DigiKey part number

668-POM-2722L-ND

1/8" TRS plug and shielded

wire. https://www.amazon.com/dp/B08TSX116N?ref=ppx_yo2ov_dt_b_fed_asin_title&th=1 Nice shielded jumper 8' makes 2 mic cords

Micro Switch https://www.amazon.com/dp/B07NVD4YZZ?ref=nb_sb_ss_w_as-reorder_k3_1_12&pf_rd_p=XR7Q0U9GWA41&pf_rd_r=2Bswitch&th=1

You will need a soldering iron adapter for heat and install 3 mm inserts work fast keep insert square to housing

You may have to file some excess material that is pushed up inserting inserts

Mic Body is PLA or ABS or PETG

Strain relief is TPU

After printing you will need to remove support from Mic cavity and use exacto knife to free up PTT lever. Heating blade helps.

Install the 5 Hex inserts using soldering iron and adaptor, heat to around 175 degrees

Install micro switch with 2 3x12 hex head screws

Push Mic into recess (When I use 10mm Mic element I back bore the mic recess in milling machine 10mm dia x 9mm deep)

Maybe someone can modify STL for 10mm option just easy for me to do in mill.

Push cord thru strain relief.

attach wires to mic and micro switch

On wiring V12 has a jack for Mic and PTT using 1/8 TRS jacks.

Keeps mic ground and PTT chassis ground isolated.

I kept the 1/8 TRS PTT jack but changed Mic jack to TRRS and jumped the PTT to second ring on TRRS jack.

You will need a TRRS jumper instead of the TRS shown

above https://www.amazon.com/dp/B0DHCGR2KN?ref_=ppx_hzsearch_conn_dt_b_fed_asin_title_4
